Bucket

Project Description

In this project, we aim to develop a creative portfolio platform , where designers, artists, and creators can showcase their work, connect with other professionals, and explore a diverse range of creative projects. The platform will provide a user-friendly interface, allowing users to upload their portfolios, discover inspiring content, and interact with each other in a collaborative environment.

Modules

User Authentication and Profiles:

- User registration and login functionality.
- User profile creation and management, including profile pictures, bio, and contact information.
- User dashboard for managing uploaded projects and likes.

Project Upload and Management:

- Ability for users to upload various types of creative projects, including images and descriptions.
- Support for categorizing projects into different disciplines (e.g., graphic design, illustration, photography, etc.).
- Editing and updating project details after upload.

Discover and Explore:

- Search and filtering options to discover projects based on different criteria like category, popularity, and creation date.
- Trending projects and featured artists sections.

Interaction and Engagement:

- Like, comment, and share functionality for projects.

API Endpoints

Home page

- ReadAllPost()
- ReadPostByInputs()

Project Page

- ReadPostByID
- UpdateCommentById()
- UpdateLikesById()

User Dashboard

- ReadUserById()
- UpdateUserById()
